My Self

Hey, I'm Saathvik Bogam, a BS-MS student at IISER Bhopal. I have a lot of stuff I'd like to say, but oh well, can't really write *everything* about myself here. I really like Math and Physics, as you've already guessed, and their intersection even more. Other than that, some quirks of mine are that I exclusively use *fountain pens* to write, and I'm the only person who wears a *necktie* on campus pretty regularly. Also enjoy anime and stuff.

Academic Projects and Self Study

Academic Projects: Modelled a double pendulum using `NumPy` and `PyGame` Python libraries , a project in Ramanujan Club on Topology of Metric Spaces under Dr. Atreyee Bhattacharya and Negative Curvature under Dr. Kashyap Rajeevsarathy.

Self Study: Quantum Mechanics (*Introduction to Quantum Mechanics*, D.J. Griffiths), Advanced Quantum Mechanics (*Modern Quantum Mechanics*, J.J. Sakurai), Special Relativity (*A First Course in General Relativity*, B. Schutz and *Geometry of Minkowski Spacetime*, Gregory L. Naber), Metric Space Topology (*Topology of Metric Spaces*, S. Kumaresan), Differential Geometry (*Manifolds, Vector Fields and Differential Forms*, G. Gross and E. Meinenken)

Education

Bhopal, India

Indian Institute of Science Education and Research

BS-MS Dual Degree — *Aug 2025 – Present*

- **Cumulative Performance Index (CPI):** **8.56 / 10.0**
- **Selected Coursework:** Intro to C Programming, Linear Algebra, Electromagnetism, Waves and Optics, Multivariable Calculus, Groups and Symmetries.

Technical & Computational Skills

- **Spoken Languages:** English, Hindi, Telugu, Urdu, Japanese.
- **Typesetting & Tools:** LaTeX, Tikz, Git, Linux (`Fedora Workstation,Arch`).
- **Symbolic Computation:** Wolfram Mathematica, Python (`SymPy`).

- **Programming Languages:** Python (`NumPy`, `Matplotlib`), C.

Extracurriculars

- **Coordinator** of ComiX Club (2025-)
- **Core Committee Member** of Physics Club (2026-)
- **Core Committee Member** of Animal Welfare Society (2026-)
